Schinnerer Construction Executive Speaks at Industry Functions

Chevy Chase, MD—This Spring, Schinnerer's top construction executive has been invited to participate in several design industry meetings and conventions. Her participation ensures the insurance industry's perspective regarding the design profession's exposures and issues is represented.

Recently, the American Institute of Steel Construction and the ACCL conducted an eConstruction roundtable discussion in New Orleans. Schinnerer's Managing Director, Lorna Parsons, was on hand to discuss Building Information Modeling (BIM)*.

In May, the American Institute of Architects held its National Convention in San Antonio, Texas with the theme *Growing Beyond Green*. Ms. Parsons facilitated a panel of attorneys and discussed the liability issues around integrated practice and how BIM* is a great tool to facilitate integrated practice.

*Building Information Modeling (BIM) is a 3D modeling software that incorporates information about the design and materials into a collaborative shared model that can be used for the life of the project from design through maintenance.

Victor O. Schinnerer & Company, Inc., is one of the largest and most experienced underwriting managers of professional liability and specialty insurance programs in the world. Schinnerer now serves more than 55,000 insureds in various specialty industries through independent agents and brokers. Learn more at: www.Schinnerer.com.
